Last week, Cardinal Basil Hume, the Archbishop of Westminster, warned him he may have to step down as general secretary of CND

Mgr Kent said that it was right for priest to be involved in such issues as nuclear disarmament. "I think the church is absolutely in the world, it should be in the world, and we are talking about peace and justice and reconciliation and not killing each other. "If the chorch is busy sitting

with the "problems of our neighbour and one of the problems of our neighbour is problems of our neighbour is being hlown up by this ridiculous arms race".

Although Cardinal Hume recently renewed his consent

for Mgr Kent to continue as general secretary of CND, he admitted to "serious misgivings" and said that the task might be better undertaken hy a lay person.

Asked about the chances of giving up CND. Mgr Kent replied: "I am very committed to peace work and I am going to stay with peace work for the rest of my life."

But Mgr George Leonard, Cardinal Hume's personal aide, said that the archbishop's permission to contione was unt "absolute and unconditional". activity which would make Mgr Kent's role "highly inappropri-ate, highly ambiguous and highly compromising", he said on the independent television programme, Credo.

The Israeli move followed the return to Jerusalem of Mr Shultz, who immediately began a fresh round of talks with Mr Yitzhak Shamir, the Foreign Minister, and Mr Moshe Arens, the new Defence Minister.

Before Mr Shultz left the meeting to go on to a private session with Mr Menachem Begin, the Israeli Prime Minister, he was asked pointedly hy Mr Shamir to clarify Syria's stand in view of the hardening of public comments from Damuscus over the past fort-

The intentions of the Syrian regime remain the most pres-sing question over shadowing Mr Shultz's delicate mission and the random factor which many Western diplomats fear is most likely to sabotage any Israeli-Lebanese agreement; should one ever be reached.

The recent Soviet military huild-up in Syria has provided. Israel with what some members of the American party see as a convenient diversionary tactic to avoid pressure to soften some of its most uncompromising security demands for southern Lebanon.

Last night's Israeli demand followed reports that Mr Shultz bad postponed a previous plan to visit Damascus early this week as a central part of his mission. American officials told Israel radio that he would only go there when there had been more progress in the negotiations and something "worth-while" to talk about to the Syrian Government.

12 missiles fired in sub hunt

Stavanger (AP) - The Norwe-gian Navy vesterday fired 12 more and-submarine Tern missiles and dropped one more depth charge in an intensified five-day hunt for a possible foreign submarine off the coast.

The Navy was also checking and analyzing an oil slick discovered in the same area where the 12 missiles were fired. Ten other Tern missiles were fired by a frigate in the same area on Saturday. Mr Erik Senstad, the Defence

Ministry's information officer, confirmed the new firings and said the surface fleet taking part in the hunt has been reinforced with a special diving vessel.

He said six missiles and the depth charge were fired at 4.30 pm and the next battery of six missiles an hour later. Both rounds came in the

southern part of Skaaneviksfjor-den about a mile and half off the southern tip of the island of Halsnoey.

"The bomb and the 1: missiles blasts were ordered by a frigate captain after establish ment of sonar and hydrophone echo sound contact with an underwater obejet believed to be a submarine," Mr Senstad

had announced the discovery of an oil slick in Skaaneviksfjorden, Mr Senstad said.

"This oil slick may have originated from many sources. It may be quite regular spill oil from previous passing boats and now being carried to the shore by the tide. It may also come from other sources. including from a large oil tank the local people say was lost in the fjord during a tow recently.

The new device, called the "cleaved coupled-cavity" (abbreviated to Ci), not only produces high quality light but the laser can be switched between 10 different wavelengths, more than a billion times in one second.

The fact that the device can switch rapidly between one wavelength and another is exciting the scientists at ATT. By using that electronic characteristic it is possible to encode several com signals on one beaut of light.

End of the **Astor** 'romance'

By Geraldine Norman Sale Room Correspondent

One of the most grandiose follies of the Edwardian era, the collection of arms, armour and Waldof, 1st, Viscount Astor, is to be dispersed for good at Sotheby's oo Thursday and Friday. The total value is estimated at £1.8m.

William Waldorf acquired them to embellish Hever Castle, in Kent, which he bought in 1903, enthused by its associations with Anne Boleyn who passed her childhood there before tragically catching the eye of King Henry VIII.

The collection is packed with pieces that have historic associations, real or imagined, for he was a true romantic.

The centrepiece of the sale is

the superbly wrought suit of Milanese armour made for King Henry II of France around 1540-1545 and now valued at £500,000. The King was one of the most demanding and enthusiastic patroo's of the arounter's art, but he was clearly particularly proud of this elaborate Mannerist suit made for him by Giovanni Paoli Negroli, since a portrait of him wearing the armour was painted by Jean Clouet.

This is oot the only suit of armour for which the historical associations are attested by a cootemporary portrait. The Flemish three quarter armour, the plates etched and gilt with a pattern of laurel branches and interlacing snakes, was made for Henry Wriothesley, Earl of Southampton, best known as

Verdi opera cancelled by Covent Garden

By Christopher Warman

Financial difficulties have caused the Royal Opera House Covent Garden to cancel one of its new productions for the next

Verdi's La Forza del Destino was to have been produced by Rudolph Noelte of West Germany and was well into the

planning stage.

Covent Garden, which confirmed the decision yesterday, is to announce its programme for next season, which runs from autumo this year to the summer of 1984, oo May 17.

The cancellation is the late sign that the three sources of Royal Opera House income – public subsidy, private sponsor-ship and box office receipts – are proving inadequate.

The present season has had only two new productions, including Puccini's Manon Lescant, which opens with a gala performance attended by Queen Elizabeth the Queen Mother tomorrow and stars two of the greatest operatic draws, Placido Domíngo and Kiri te

Kanawa. Covent Garden's decision to abandon its new production of La Forza del Destino was foreshadowed last November when Sir Claus Moser, the Royal Opera House chairman, expenditure at a time of economic recession meant the prospect of fewer productions

or shorter seasons.

He said then that Covent
Garden was examining the
cancellation of new productions as an alternative to lowering its

international standards. For 1983-84 the Royal Opera House has received a grant from the Government of £10.25m, which covers oot only the opera hot also the Royal Ballet and the Sadler's Wells Ballet. It has also been given a grant of £200,000 towards the cost of a visit to Manchester in the

Challenge over wildlife sites denies that there is any to

An ominous constitutional question lies behind the public argument between farmers and naturalists about protecting-wildlife in the countryside. It could strike at the heart of the jealously gnarded statutory right of the Nature Conservancy Council to decide whether a piece of land descrives to become an official site of special scientific interest.

That right came under attack last year when Conservative MPs protested to ministers about the council's decision to declare 2,500 acres of West Sedgemoor such a site, Ministers agreed with the council that the Wildlife and Countryside Act, 1981, gave it the sole right to decide whether a declaration was justified.

Although the outcome will not be clear until next year, the technical arguments for linking the computers in a single network seem overwhelming.

Red herring of medievalism

By Charles McKean Architecture Correspondent

The architect of the new huilding at 66 St James's Street, off Piccadilly, believes that his design "evokes a medieval feeling appropriate to its historic London setting". That is just one of several curiosities regarding this unusual structure.

The claim is curious for three reasons: first, why Tripes Architects should believe that a medieval feeling should be appropriate here; in a part of London which, barring the Tudor hrick palace at the bottom of the hill, is the centre of clubland, and redolent of the late seventeenth and early eighteenth centuries.

The only medievalisms that occurred here were those perpetrated by the late nineteenth century. The second, even greater curiosity, is what makes the designer believe that his structure exudes anything medieval at all.

The final curiosity, I suppose, is why the designer finds it necessary to make such a palpably unlikely comparison to defend a strongly modern design. The partner in charge, Mr Rodney Gordon, was once a partner of the RIBA president, Mr Owen Luder, a man preferring to defend modern design in its own terms.

Is there, in fact, any medievalism in the huilding? The structure is hronzed metal infilled with glass, so it cannot be the materials. It is a fivestorey corner huilding, with a two-storey attic space: fairly standard West End size and proportions: so it cannot be

The only unusual feature so far is the use of those materials for this type of infill block in this tightly controlled location, hut that is not medieval.

So, is it the plan? At last, a faint gesture to the past there are towers at each corner, hillowing out from the main facade, hut hardly sufficient to justify the term medieval.

Had the towers been capped by crenellatioos, parapets, a cap house and a flagpole, theo the connexion might have been made. But, iostead, their tops have been sliced off like

fingertips with a sharp potato knife: simply to look at them makes the observer say "ouch". If one looks for a reasonably accurate metaphor for this building, it must be something to do with the space programme; particularly the way the top of the building, tostead of ending firmly as a building should with a cornice or roof, tapers away into the sky. The materials and mechanistic proportions all tend toward the

But such an image would not be acceptable to the public in this location. Its predecessor, Map House, was equally intrusive in its day. Brick and stone, turrets and mullioned windows, it was the usual second rate Edwardian baronial building that everybody would press to preserve in terror of the alternative. With unusual courage for London, the council

lacks, of course, the intricate hut it gains in strength of character except at the top. What clearly happened at the

top is interesting. There is a comice and roof line. Most huildings are able to set back a mansard above the cornice line; this building without the differentiation a cornice provides, simply slopes back, whereas the inherent character of the building should have indicated a projection at this point, turret-wise.

In other words, the planning authority could not quite come to terms with the dichotomy of having, on the one hand, the general height restraints for this district and, oo the other, permitting a building of this distinctive nature. The compromise result, at skyline level, is

clearly its weakest point.

The "medieval" gesture is a red herring and a sign that the architects think that the public will not accept the truth. It is a modern building, and a suitable if vulgar replacement for what must have been, in its time, an appalling solecism in this august

In consequence "our countries urgently demand effective measures which will lead to . . . the provision of sufficient financial resources under ad-equate conditions."

The words "under adequate conditions" are crucial. Both Mexico and Brazil have re-ceived loans of more than \$5 billion (£3.3m) this year alone from the international financial community, but the loans have been secured at the expense of both higher than normal interest rates and austerity measures imposed by the International Monetary Fund - on the two countries' economies.

The interest payments on their debts, which combined exceed \$170 billion, have severely stunted the growth of

their economies.

Mexico averaged 8 per cent growth during the 1970s but this year, with no money left over after the debt payments to channel into industry, the Government will be happy if it can keep the ecocomy at zero growth.

Corsican bomb gang smashed

Paris (Reuter) - French police have smashed a Corsican
National Liberation Front
(FNLC) ring in Paris and
discovered bomb-making and \$100,000 equipment (£66,000) of counterfeit American money, police sources said yesterday.

Eight men detained after Friday's wave of bombings in in the attacks on four railway. stations and an Air France

and Alfortville were also hit by bombs as the guerrillas broke a two-year truce with the Government in mainland France. Fifteen explosions caused serious damage but no casualties.

Police sources said that the authorities learnt by chance of the FLNC's plans late on to seek reclection in 1984. Thursday, only a few hours before the explosions, and mobilized scores of men to try

to prevent them.
The Government outlawed the FLNC last January after blaming it for about 800 bomb attacks on French settlers and businesses in Corsica last year.

Ethiopian rebels to free relief team soon

The 10 foreign relief workers, including four Britons and two Irish nurses, kidnapped in Ethiopia 10 days ago, will be released "48 soon as possible." their captors claim. But the Save the Children's fund, for whom the Britons work, is treating the claim with caution, the Press Association reports.

Mr Tewelde Wedelias, a

Rome representative of the kidnappers' group, the Tigre People's Liberation Front, said Colonel Hugh Mackay, director of SCF Overseas, had been told in Khartum last week that the

capties' safety was assured.
But he added: "I cannot give a date for their release - it will be as soon as they have seen the conditions in which 1.2 million Tigran people are suffering in

the present drought."

Tigre lies in northern Ethiopia, on its border with Eritrea. The rebels claim the relief workers are being held as "guests" not hostages.

Fourteen die in plane crash

Jacksonville (Reuter) - Fourteen people were believed killed when a Navy C131 transport aircraft en route to the US base at Guantanamo Bay, Cuba, crashed into the St John's river here in Florida, while returning to its Jacksonville base with engine trouble.

Only one survived, Melissa Kelly, aged 32, a technician. She was clinging to a floating piece of luggage.

The madness and the ecstasy

In the summer of 1943 Sir Harry Oakes, one of the world's richest men, was found bludgeoned to death in his bed. The murder shook not only the lintus eating residents of the Bahamas; but the rest of the world when it became known that his close friend, the Duke of Windsor, then Governor of the Bahamas, was threatened with a similarly nasty death if he did not give way to the plans of a Mañoso syndicate to build a casino on Nassau.

It was not Sir Harry's death that intrigued the film director Nicolas Roeg so much as the extraordinary way he had made his fortune, and its effect nn his life thereafter. As a young man, Oakes was one of the many struggling prospectors who descended on the Yukoo at the turn of the century in search of gold. A 14-year trek to goldfields from Alaska to Australia finally resulted in the realization of his dream when he discovered in northern Ontarin the second largest gold mine in the Western Hemisphere. The downand-out prospector, bereft of friends and mnney, and almost insane from the appalling conditions he had been living. under, was suddenly a billionaire.

Roeg is adamant that Eureka, his new film opening in London on Thursday, is not a dramatized documentary of Sir Harry Oakes's life. His thoughts had been concerned with the theme of obsession with mooey when he read Marshall Houts's book on the Oakes murder case, King's X, and it provided the shell for what he wanted to say. The main character in the film, Jack McCann, played by Gene Hack-man, has a similar background. Jane Lapotaire plays his wife and Theresa Russell his daughter. The daughter's playboy husband, who was wrongly accused of the murder, is played by the

Dutch actor Ruteer Haner. "As with Bad Timing, something

incident and the position of the characters reflected some kind of truth characters renected some kind of truth in my head", says Roeg. "I would hope that anyone who sees the film would feel something of Jack McCann's predicament, it is about a man who experiences the ecstasy of finding what he is searching for. But ecstasy is a dangerous emotion to reach. Where dn you go after that? What can you reach for after ecstasy? A more ecstatic for after ecstasy? A more ecstatic ecstasy? In a way his story is over, but his life is not. He has to live on to wonder what his life means.

Eureka is likely, as with Roeg's past work, to cause some dissension among work, to cause some dissension among critics. His producer, Jeremy Thomas, who worked with Roeg on his previous film, Bad Timing, says. Nic. has the ability to make an andience feel it has been physically punched in the stomach the way he suddenly catches them off guard." The disturbing images do indeed have that effect, though one of the strongest, the setting fire to the dead man, is based on fact. The distributors have obviously felt rather weak-stomached in their decisioo to opeo it quietly at the Screen on the Hill and the Odeon Kensington rather than going for a general release. Presumably, if it becomes a cult film, they will coosider the West End.

"I don't believe my films are inaccessible", says Roeg. "If they were I would be inaccessible myself. What I am trying to do, as anyone who works in any form of art or communication is trying to do, is to express an emotion. The film audience is so curiously demanding in conservatism. You don't find that in any other form of expression, such as dance or theatre. People never say of dance, 'I don't understand what is happening'. Yet film is the newest and should be the

He has been on record as saying that making films'. I'm inclined to agree."

As in his earlier Don't Look Now, the images often show what is going on in the mind of one of the characters rather than an actual event. The strike, where McCann realizes he has stumbled across one of the richest seams of gold, is expressed in terms of a veritable flood of gold which all but drowns him. It is a way, says Roeg, of conveying to the audience the mystical thrill for McCann - io reality all be would have seen was some quartz in a rock, but the mind of a miner would have immediately leapt to the riches it meant.

At 55, and with six films to his credit, Roeg still retains a certain modesty, almost unsureoess, about explaining his work. Dealing so much in the visual and emotional medium, he finds it hard to rationalize about them. Significantly, oo a recent television programme, his colleagues and critics spent oearly an hour pontificating about the meaning of his films; finally the director himself sat down to be interviewed, and simply delivered benign shrugs and self-effac-ing laughter when faced with discussing

Anyone expecting the new Parsilal to be an intense spiritual experience is likely to be disappointed. What Ponnelle achieves is a vindication of a drunken intruder - is not only Parsifal as a cogent musicodramatic entity, capable of expressing something profound about the complexity and contradictions of man. His viduality, colour and even constant reference-point is a compassion. The same stage glowing temple interior, less picture in Act II, refreshing constants than Washington glowing temple interior, less ornate than Wagner's original conception but just as finely sculpted, and, like every Ponnelle set, perfectly symmetrical. The Body The Pit

Like the prospect of hanging, the impending installation of Cruise missiles is serving to and not least in the theatre where a new form of dark comedy is taking shape. Its origin is Giles Cooper's master piece Mathry Beacon, and it begins with an image of ordinary rural life which becomes treating to the cat. There he sits watching the cat. There he sits watching television, flanked by Mrs May and her husband, who is wearing his gas mask as usual. Meanwhile there are close harmony links from a trio of comes steadily overshadowed by the presence of menacing silos hidden away up side roads, and the scream of Vulcan bombers tearing through the peaceful skies.

Following Peter Whelan's Clay Nick Darke's The Body is the second such piece to appear at the Pit, and I wish I could say that something more than its heart was in the right place. In outline, it tells the parallel stories of a Cornish village and

Moscow? Niet, but it's close

It should have been filmed in Moscow, of course. After all, rumour had it that Yuri Andropov has a copy of the 335page best-selling paperback in his bookcase, fuelling speculation as to the unlikely prospect of a former head of the KGB heing a "closet liberal". But to, they began the making of Gorki Fark in Helsinki and have now moved on to Stockholm.

worth a try.' Despite the reported presence of the hook in Andropov's bookcase, or perbaps because of it, the answer was a predictable niet and Apted was forced to tread the same path as author Cruz Smith: a couple of weeks in Moscow for research and a heavy reliance on Russian emigre advisers. He then substituted the social democratic greyness of Scandinavia for the darker

liues of the Soviet Union. For a film-maker in permanent quest of authenticity, it went against the grain. When Apted filmed The Coalminer's Daughter, the story of an American country music singer, he lived in Kentucky for six months before shooting started, "sorting out what was true and what was false and generally getting the whole feel of the place". He later coaxed an Oscarwinning performance from Sissy Spa-

A big problem has been the exceptionally mild winter in Scandinavia. When the unit arrived in Helsinki in February the snow was several feet deep in places. It rapidly melted as spring arrived unexpectedly early. As he walked back to the set Apted glared at the rain-filled sky. "Snow," he said. "Snow, please, I need snow". When his prayer remained unanswered he moved the unit north above the Arctic Circle and used paper snow imported

from England for storm scenes. But Apted still faces his worst dilemma: how to deal with the terrifying opening sequence in which three bodies are found buried in Gorky Park, their faces removed by furrier's knife. "We have plastic bodies,

Somehow or other, at the age of 64, he will find the time to be an outside administrative director - there are some who tip him as chairman of a new Sotheby's board, just as he has found the time to combine the chairmanship of HTV, the indepen-dent television company sarving Wales and the West of England, with wales and the west of the British Board of Film Censors, not to mention involvements in the Royal Institute of International Affairs and several

charities and pressure groups.

A certain nimbleness of mind and body is needed to view the latest Monty Python film and, immediately afterwards, take part in a discussion of defence and the Soviets Unioo without getting hopelessly mixed up. Lord Harlech coped admirably with this strange juxtaposition of appointments last week, but said that what he really liked about being the British Ambassador to Washington (1961-65) was that you couldn't do anything else at the same time. Lord Harlech, happy to ride a favourite hobby-horse, stretched his long legs to a well-satisfied manner. We were sitting in his office at the London quarters of HTV. "I wanted that sort of thing," he said, and so he has. His office was designed by David Mlinarie in bright blocks of: vellow and rusty pink. As working environments go it is perfectly.

He had not really meant to be an almost full-time working chairman of a television company and was rather surprised when his consortium, which included Richard Burton and Elizabeth Taylor, was awarded the franchise in 1967. When it did win, Lord Hill of Luton, the then chairman of the then ITA (Independent Television Authority) said sternly: "I'm relying on you,

In the same year, his first wife, Sylvia, died in a car crash, at the age of 45 and after 27 years of marriage, and he fiscinght that to resume his political career without her would be agonisingly lonely. Among the men in independent television, hardly a soft-hearted bunch, he has won great respect for the way he unites his company's two boards, representing the two different regions, according to one executive, this is particularly impressive because the two boards look at each other. "like Victorian explorers discovering a tribe of

He has also been a mildly persistent critic of the way indepen dent television is run. He said that as a company HTV tended to have the philosophy of television and its political aspects "constantly under discussion" and this is borne out by the busk flow of letters to this

His parliamentary career was enviably straightforward: PPS to Selwyn Lloyd then an Under-Secretary of state for foreign affairs and, 60 days later, Minister of State in the same department. I suggested that his family motto "Late but Earnest" could not really apply to a man who achieved so much, so early. deciding factor; m accepting the job was that his close friend, John F. Kennedy, had just become America's President. He had first met Kennedy when the latter was a 21-year-old student at Kennedy's sister Kathleen, married Lord Hartington, Lord Harlech's cousin and Harlech married Kat-leen's best friend; Sylvia Lloyd Thomas. The two families were more grimly united by death: both Kennedy's and Harlech's older brothers died young as did several

Kennedy thought Haricch "the wisest man I have ever known" and their friendship put several political noses out of joint. "It was a very exciting time", is all Lord Harlech will venture on the Camelot era and

his promised account of the daily conversations with the President has never been published. But according to other sources. Harlech's influence was enormous. The Washington columnist, Andrew Tully, wrote that without Harlech's restraining influence, the Bay of Pigs episode might have escalated into war. To deal with such a potential powder keg must have required great sensitivity from the Ambassador, whose own mother, when he was a little boy, nicknamed him Trotsky because of

his rebellious temperament. By the time he returned from

the darlings of the King's Road, particularly his daughter Jane, who with her husband, Michael Rainey, ran one of the most exciting of the crop of new boutiques called "Hung on You. Lord Harlech, as much as his children, blossomed in the 1960s, which he recalled with wistful nostalgia. "Life was a very joyful experience. The philosophy that there was more to life than the rat race and the daily grind, all that I found admirable. I liked the idea that people, especially men, should look more beautiful, although this has not been wholly successful. I find it very odd that now we're all

back in pinstriped suits."

He vividly described a dance given for his children in 1965 - "the year when everyone looked quite wonderful". The marquee was hung with a tapestry, the musicians played from a platform that rose out of the dance floor. "Cecil Beaton said it was the most beautiful dance he'd ever seen." He was the most supportive and sympathetic of parents. Wheo his daughter, Alice, took up with Eric Clapton, during the musician's intensively drug-ridden period, he tried to help him come off drugs. For such gestures he received much abusive mail. Of his rainbow-clad children, one, Julian, found dead in 1974, the

This good friendship led to one newspaper publishing about Harlech a nine-part series and a Sunday colour supplement making him the cover story.

In 1969, he married a woman with the same assured New Yorkinspired elegance as Mrs Kennedy Pamela Colin was the London editor of American Vogue, a dynamic career woman. Thirteen years on, by a process of osmosis, she has the comfortably spread-out shape of aristocratic Englishwomen and like

them, she spends a lot of time cooking superbly.

The Harlechs' wedding was attended by the Snowdons and Patti Boyd and George Harrison, some-thing which perhaps prompted a-snaring New Statesman writer to say that Lord Harlech's not "some much a distinguished name as a glamorous one." The glamorous label stuck more firmly when he became the chairman of Great Western Festivals and wanted 10. organize a pop festival "which." wasn't a terrible rip-off for both artists and fans". His reward was more abusive mail and an obtrusive and unnecessary police presence at the festival.

Referring to Sotheby's, the word "unfair" was often on his lips. One "unfairness" was that Mr Graham. Llewellyn, Sotheby's chief executive, has said that Mr Swid and Mr Cogan "know nothing about the art auction business and nothing about Britain". In fact, both men sit on the boards of several museums and galleries and are art collectors. "I compare their achievements with those of some of the directors of Sotheby's, including the chairman," said Lord Harlech stonily.

He himself has been a trustee of " the Tate Gallery and is oo the advisory committee of the V & A... His wife, like her father, Ralph Colin, has a considerable knowledge of the art world and HTV is involved through its own fine art company, Frost and Reed. Little wooder then that the normally unflappable Lord Harlech got angry wheo a reporter suggested that he might be allyiog himself with the Philistines, "I thought that Mr Cogan and Mr Swid were not being fairly treated. It seemed to me that they had some reasonable ideas that Sotheby's ought to listen to but they weren't given a fair hearing. They would have liked to have had a friendly discussion but were denied shareholders won the company. Chairmen can sometimes forget that this is the case."

It's an unpleasant situation but Lord Harlech is used to such things. The man who was Britain's special envoy to Africa on the problem of Zimbabwe in 1979 and described his role as "an exercise io quiet diplomacy"; the man who accused the Russian delegate to the UN, Mr Zorin, of "an intemperate and misleading outhurst" without lasting harm being done, can surely organize the way pictures come under the hammer. And if it leads to more public baiting? Lord Harlech smiles tolerantly. "I doo't worry about those things a great deal."

The giant turtle: conservation methods now being questioned

Floating a new theory

These are the days, the shade of Solomon reminds us, when "the flowers appear on the earth; the time of the singing of birds is come, and the voice of the turile is heard in the land". This year's voice, as it happens is. likely to be the inspiration for a tair amount of Solomonic wisdom as scientists struggle to come to terms with a booklength argument that throws many of their most cherished

This is Jago, born in London zoo in Regent's Park on March 12, 1982, and pictured in the newly published Annual Report of the Zoological Society of London for that year, "The date was particularly notable for the captive breeding of this endangered species" because it coincides with the birthday of Bulu, Jago's 22year-old grandfather. Jago is "the first orang-utan to be born in Britain from two captive-born parents", the report continues. The baby is being successfully reared by his mother Suka, despite the fact that she was herself hand-reared."

With a deficit of just under £1.4m at the end of 1982, the report makes sombre reading in some parts, although the society can claim more than enough captive breeding successes to be getting on with, including the rearing of the first gaur calf to survive in Britain, and the birth of two black rhinoceros calves, one of them named after Esther Rantzen. The giant pandas, as usual, failed to breed, although their perennially optimistic keepers say they are hopeful for this year.

Salman Rushdie takes a dissenting view of 'Gandhi'

Truth retreats when the saint goes marching in

Deification is an Indian disease, and in India, Mohandas Karamehand Gandhi, great soul, little father, bas been raised higher than anyone in the pantheon of latter-day gods. "But why". I was asked more than once in India recently, "why should an Englishman want to deify Gandhi?" And wby, one might add, should the American Motion Picture Academy wish to help him, by presenting, like votive offerings in a temple, eight glittering statuettes to a film that is madequate as hiography. appalling as history, and often laughably crude as a film?
The answer may be that Gondhi

(the film, not the man, who irritated the British immensely, but who is now safely dead) satisfies certain longings in the Western psyche, which can be categorized under three broad headings. First, the exotic impulse, the wish to see India as the fountain head of spiritual-mystical wisdom. Gandhi, the celluloid guru, follows in the footsteps of other pop boly men. The Maharishi blazed this trail.

Second, there is what might be termed the Christian longing, for a "leader" dedicated to ideals of poverty and simplicity, a man wbo is too good for this world and is therefore sacrificed on the altars of history. And third, there is the liberal-conservative political desire to hear it said that revolutions can, and should, be made purely by submission, and self-sacrifice, and noo-violence alone. To make Gand-in appeal to the Western market, he had to be sanctified and turned into Christ – an odd fate for a crafty Gujarati lawyer – and the history of onc of the century's greatest revolutions had to be mangled. This is nothing new. The British have been mangling Indian history for

centuries.

Much of the debate about the film has concerned omissions: why no Subhas Bose? Why no Tagore? The film's makers answer that it would have been impossible to include everything and everyone, and of course selection is central to any work of art. But artistic selection Methought the PHSub-editor had blighted the chances of readers suggesting appropriate sponsors for Kent Opera's forthcoming production of Il Scraglio by the cleverness of his beadline in the Diary of April 22: Girling? (Geddit? Oh, never mind). But no, suggestions flowed in, and will all no doubt be hopefully followed up. Favourites creates meanings, and in Gandhi these are frequently dubious and in some cases frighteningly naive.

Take the Amritsar massacre. This is perhaps the most powerful sequence in the film, It made me cry. Both the massacre and the subsequent court-martial, at which outraged Englishmen question the unrepentant Dyer with barely suppressed horror, are staged accurately and with passion. But what these two scenes mean is that Dyer's Sultanas would leap at it, but the actions at Jallianwala Bagh were those of a cruel, over-zealous individual, which were immediately condemned by Anglo-India. And that is a complete falsehood.

The Brinsh in Punjah in 1919 were panicky. They feared a second Indian Mutiny. They had night-mares about rape. The court-martial may have condemned Dyer, but the British in India did not. He had taught the wogs a lesson; he was a hero. And when he returned to England, he was given a hero's welcome. An appeal fund launched on his behalf made him a rich man. Tagore, disgusted by the British reaction to the massacre, returned his knighthood.

In the case of Amritsar, artistic selection has altered the meaning of the event. It is an unforgivable

Another example: the assassin-ation of Gandhi. Attenborough considers it important enough to place it at the beginning as well as the end of his film; but during the intervening three hours, he tells us nothing about it. Not the assassin's name. Not the name of the organization behind the killing. Not the ghost of a motive for the deed. In a political thriller, this would be merely crass; in Gandhi, it is something worse.

Gandhi was murdered by Nathuram Godse, a member of the Hindufanatic RSS, who blamed the Mahatma for the partition of India. But in the film the killer is not differentiated from the crowd; he simply steps out of the crowd with a gun. This could mean one of three things: that be represents the crowd—that the people turned against Gandhi, that the mon threw up a killer who did its work; or that Godse was "one lone nut", albeit a lone nut under the influence of a sinister-looking sadhu in a rickshaw, or that Gandhi is Christ in a loincloth, and the assassination is the crucifixion, which needs no explanation. We know why Christ died. He died that others might live.

But Godse was not representative of the crowd. He did not work alone. And the killing was a political, not a mystical, act. Attenborough's distortions mythologize, but they also lie.

Ah, but, we are told, the film is a biography, not a political work. Even if one accepts this distinction (surely spurious in the case of a life lived so much in public), one must reply that a biography, if it is not to turn into hagiography, must tackle the awkward aspects of the subject as well as the lovable side. The brohmocharya experiments, during which Candhi exceld lie with young which Gandhi would lie with young which Gandhi would lie with young naked women all night to test his will to abstain, are well known, not witbout filmic possibilities, and they are, of course, ambiguous events. The film omits them. It also omits Gandhi's fondness for Indian billionaire industrialists (be died, after all, in the bouse of the ricbest of them, Birla House in Delhi). Surely this is a ricb area for a biographer to mine: the man of the masses, dedicated to the simple life, masses, dedicated to the simple life, self-denial, asceticism, who was financed all his life by super-capitalist patrons, and, some would say, hopelessiy compromised by them? A written biography which failed to enter such murky waters would not be worth reading. We should not be less critical of a film.

Gandhi presents false portraits of most of the leaders of the independence struggle. Patel comes across as a clown, whereas he was one of the hardest of hard men. And it was witty to portray Jinnah as Count Dracula. But the important changes are in the personality of Nehru and in the decision to crase Bose from

In both cases, dramatic interest bas been sacrificed in the interests of deification. Nehru was not Gandhi's disciple. They were equals, and they argued fiercely. Their debate was

central to the freedom movement -Nehru, the urban sophisticate who wanted to industrialize India, to bring it into the modern age, versus the rural, handicraft-loving, some-times medieval figure of Gandhi; the country lived this debate, and it had to choose. India chose Gandhi with its heart, but in terms of practical politics, it chose Nehru. One can understand nothing about the nature of India's independence unless one understands the conflict between these two great men. The film, hy turning Nehru into Bapuji's acolyte, manages to castrate itself.

And Bose is selected out. Bose the guerrilla, who fought with the Japanese against the British in the war, Bose whose views could have provided another sort of counterweight to Gandhi's and so improved the film. The message of Gandhi is that the best way to gain your freedom is to line up, unarmed, and march towards your oppressors and permit them to club you to the ground; if you do this for long enough, you will embarrass them into going away. This is worse than nonsense. It is dangerous nonsense. Non-violence was a strategy chosen for a particular people against a particular op-pressor: to generalize from it is a suspect act. How useful would nonviolence have been against, say, the Nazis? Even in India, the leaders of

here we go, here we go...the northern lights of old Aberdeen...

That's it, I thought, it has finally bappened. The ultimate capitu-lation. Like some late deflowering of feminist purity I have admitted football to my life. And in Munich, of all places; in the hotel where once Hitler plotted Third Reich politics with his cronies. A lifetime's resistance to the terrible tyranny of football - the chants the roats, the with his cronies. A lifetime's intermittent flirtation with self-de-resistance to the terrible tyranny of struction, something which is much football - the chants, the roars, the more Scottish than Aberdonian rabble-rousing rhetoric of its areane excitements - at last began to Bayern Munich in the second leg of Bayern Munich in the second leg of excitements - at last began to crumble. I had joined Aberdeen's

Red Army.

For Aberdeen, the morning after they held Bayern Munich to a goalless draw was one milestone on their road to the final of the European Cup-winners Cup. For me, it was a stepping stone on the control of the common o me, it was a stepping stone on the path to compromise, a process effected, inevitably, by the loving fascism of marriage, wherein one parmer's compulsion to share. insights and pleasures with the other becomes well-nigh fanatical.

The deal is that he now calls himself a feminist, although he has yet to earn that right, just as I have yet to earn the right to call myself a fan, which apparently is something you become only after 20 years submersion in acid rain on empty terraces. But at least I can claim kinship with the city of the Dons and begin to go the way of all those who discuss football.

This is the first time that the slow developing Dons have reached a European final, and when they meet Real Madrid in Gothenburg on May Il they will bring to the field an unusual compound of Scottish elements, none of which normally

The Aberdeen board has only three members. Like the rest of the city the club dislikes waste and garrulity and this influential triumverate holds lightning meetings and waste fold dislightning meetings and makes fast decisions, displaying the kind of impents which gave their ground, Pittodrie, the first all-scated stadium in Britain.

One morning in March I woke up in entertainments interests – cinemas, the Hotel Vier Jahreszeiten in bingo halls and the fine His Munich and began to nibble at a Majesty's Theatre, now the property scrap of song hanging in my head of Aberdeen District Council Dick's son Ian is another director and the contract. These symptoms of manic de-pression are not at all typical of Scotland's north-east, whose tem-perament is stable, unemotional, self-interested and shrewd, its instinct for survival goes back a long way, when "Butcher" Cumberland was on his way north to sort out the Jacobites at Culloden, Aberdeen gave him a civic reception. Of all the Scottish cities it least needed the benisons of oil; it had prospered from agriculture, fishing and light industry but accepted the petroleum windfall as if it were no more than

But somehow it was inevitable that some day the Dons should find themselves as they do today, within reach of triple glory and poised to smash the dominance in Scottish football of Rangers and Celtic. They have already knocked Celtic out of the cup competition and meet Rangers in the final, despite: stumbles they are still racing Ceine and Dundee United to the top of the premier league; and they are the only British team to reach a European final this season.

Mrs Thatcher, beware the Ides of May

Labour had done exceedingly well in the local elections in Manchester the Labour had made a net gain of 443 seats. This voting pattern reinforced the government's lead in the opinion polls and confirmed Harold Wilson's intention to seek a dissolution of Parliament. Six weeks later, Mr Edward Heath was in 10 Downing

Of course, there are considerable differences between May 1983 and May 1970. This Parliament has not run quite as long as its predecessor of 13 years ago. This Conservative government's lead in the opinion polls today is of much longer duration than Labour's in 1970. On the other hand, there are even greater similarities.

Now, as then, the Prime Minister is, at any rate according to poll findings, much more popular than the leader of the Opposition. Now, as then, there is a feeling in some quarters that the Opposition is so unready for battle that the Government must inevitably coast home comfortably to victory. In 1970 the balmy spring weather engendered even greater complacency, causing Labour supporters to believe that their party was home and dry. The government entered the election a confident winner. Its downfall was all the more devastating: hubris had been recompensed with Nemesis.

I am not seeking to prove that history is sure to repeat itself: history is not necessarily like that at all. What, on the other hand, cannot be denied is that no one is a winner until the finishing post is reached. In the next seven days Mrs Thatcher faces the most difficult decision she has ever had to make. I remember so clearly Harold Wilson's sunny press interviews in the garden of Number 10 on the afternoon of May 18. the day the general election was announced. I recall, despite my own optimism about the outcome, the of plastic. dull feeling at the pit of my stomach: the knowledge that this was it, that there was no turning back.

If Mrs Thatcher decides to go ahead and call a June election, she will be burdened with that knowledge 100. After all, she cannot really be confident of winning a spring election. Otherwise we would be in the middle of one now, she would not have had to wait for the local elections to confirm her certainty. Nor will this Thursday's voting tell

On the morning of May 8, 1970, I learn. Because of the higher turn-ont reported to the Prime Minister that in the 1979 local elections, which were held on the same day as the parliamentary polling, Labour, on previous day. Dick Crossman that otherwise catastrophic day, brought similar news from Covenactually gained 504 seats. So even if try. Throughout England and Wales there were to be Labour net losses there were to be Labour net losses this week, these would not of themselves indicate a general elec-

tion victory for the Conservatives. No doubt the Conservative Central Office computer is already programmed to feed Thursday's voting patterns into the framework of the new constituency boundaries. Presumably, sophisticated extrapolations will seek to compensate for the low poll that is to be expected. However, even if the results turn out unequivocally good for the Govern-ment, these will not necessarily be translated into victory in a rushed general election; the experience of 1970 wards of that if nothing else. Mrs Thatcher has made a mistake

that is already grievous, and which might turn our to be calamitous, by allowing election speculation to build up as much as it has. If she feels able to request a dissolution on the basis of favourable local election results, it will be clear that she has not done so in conformity with her Resolute Approach, since the resolute thing to do would be to keep Parliament at work for its full term. She would be seen to be pursuing blatani party advantage. The Boadi-cea of the Fakkands would have become just another conniving party politician.

"Cut and run", the label she fears most, would dog her throughout the campaign. The alternative, however, is little more attractive. Mrs Thatcher's reputation is vulnerable to delay as well as to haste. She told the Commons the other day: "I shall not cut out any options". Accordingly, if she rejects the lune option it will now be obvious that she has done so because she remains unsure that she can win. Charges of cut and run would be replaced by jects that she is running away. The fron Lady would reveal herself as really made

The Prime Minister faces an unenviable dilemma for which she can blame no one but herself. As she agonizes at Chequers next weekend over her decision, which she has confirmed is hers alone to make, she will be haunted by the numinous words written 150 years ago by one Lorenzo Dow: "You will be damined if you do. And you will be damned it you don't". I hope the weather keeps fine for her. The author is Labour MP 10

A PRINCELY PERFORMANCE

The Queen is Queen of seventeen monarchies in the Commonwealth. That position may seem to defy the exacting notions of modern political science. However, it remains a fact that this monarchy is still a potent symbol of national unity and constitutional leadership in sixteen completely free countries, independent of Britain, which are literally continents apart geographically, socially and culturally. It may be asked how a single person can encompass so many identities, and there is no obvious answer. It must lie at the deeper level of consciousness among the countries concerned. How clse can one explain the monarch's ability to cross these continental divides and retain hold of the allegiance of Australasian, North American, Caribhean. Asian and Polynesian

Moreover, the position of the Crown in the British body politic is enormously strengthened by this extra dimension. It puts the Oueen, vis a vis her British Prime Ministers, at a much greater advantage than, say, the Benelux or Scandinavian monarchies. Sir, In your Legal Affairs Correspondent's admirably succinct account (April 25, 26, 27) of the amended form of the Government's Police and Criminal Evidence Bill attention is drawn to the omission of two of the Royal Commission on approach Criminal Procedure's main proposals, a public prosecutioo service separate from the police and the tape

stations. It is inferred that in the eyes of many the balance of the Bill, as compared with that envisaged by the royal commission, is wrong and is not capable of being put right. This line of criticism appears to assume that the reform of the whole of pretrial criminal procedure, including both investigation and prosecution, could and should be comprehended in one and the same statute. I am bound to say that this was never assumed by the royal commission, and as chairman I did not regard it

In putting forward the Bill in its present form, whilst at the same time indicating its commitment to the principle of tape-recording interviews subject to further experiment, the Government is proceeding consistently within the general

Likewise the Government has indicated its acceptance, in the Home Secretary's words, of strong case in principle for a prosecution service independent of the police" and has set up a working party to examine the main options and to prepare the way for further primary legislation in the full knowledge that there is no question of being able to get it ready for inclusion in the present Bill.

Meanwhile, accepting the royal commission's conclusion that the transition to an independent prosecutioo service would need to be a gradual process, the Government has taken additional steps in the direction indicated by the royal commission. The Attorney General has provided guidelines oo criteria governing prosecution, which are now available for the use of chief constables, and the Home Office is quickening the admittedly long drawn-out process of establishing prosecution solicitors' departments in all police forces, a step which the royal commission regarded as important in moving steadily to a

nationwide and statutory service. In assessing fairly the broad balance of the policy of which this Bill forms one part it is necessary not to discount the above consider-

Rewarding volunteers

From Mr J. Fleming

Sir, Io view of the proposed voluntary scheme to give youngsters experience in the armed services, is it not appropriate to eoosider wider provision for ucemployed people wishing to take part in other voluntary schemes?

At present a youngster wishing to do voluntary work must forfeit his memployment benefit sioce he is technically "unavailable for work". However, such work, for example with handicapped or elderly people, is often found to be highly rewarding providing the youngster with confidence and self-respect, not to mention a sense of responsibility; surely true "character-building"

Youngsters should be encouraged to get involved with all kinds of voluntary projects, not penalised financially for showing such initiative. To say they are making themselves unavailable for work is both cruel and unrealistic. The alternative of enforced idleness is far more likely to keep people unfit for

Questions over aid to Third World

Sir. Professors Bauer and Yamey (feature, April 11) do not need me to defend them from the barrage of hostile comment that their excellent and courageous article has elicited. But it may have escaped readers' notice that most of the letters cited examples of excellent help provided by voluntary agencies, like the Save the Children Fund, Oxfam and VSO (Voluntary Service Overseas) as a rebuttal of Bauer and Yamey's central point, which was that official aid cannot significantly promote

Third World development. It is true that in a short article packed with challenging ideas they did not make that distinction clear, but I would be surprised if they were oot perfectly prepared to concede the usefulness of much of the work, done oo a shoestring, by the voluntary agencies and to applaud

rt. as I do. Their scepticism was directed at official aid, provided by govern-ments and multilateral organiza-

tions like the UN, the European Development Fund and the World Bank, only a mioute fraction of which is channelled through the voluntary organizations and most of which goes directly to governments

of the recipient countries This scepticism, which Bauer and Yamey were the first to voice, decades ago, is now very widely shared, but few have the courage to say so in public or to acknowledge the debt they owe, especially to Professor Bauer, for helping to

change the climate of opinioo over the years. Frank Judd, io his letter of April 25, says: "Aid is effective if channelled io the right direction". Who could disagree? The problem is that a large part (not all) of official aid has not been and that the obstacles to a proper use of aid seem always to einde the donors.

Yours faithfully, WALTER ELKAN. Brunel University, Department of Economics, Uxbridge, Middlesex.

Cayo District, Belize, Central America.

From Mr.A. Michael Wood Sir, The arguments put forward by Professors Peter Bauer and Basil Yamey in your issue of April 11 concerning the inefficacy of aid are valuable io making us rethink aid in relation to development. I believe that this view, even if somewhat overstated and unduly cynical, is a healthier one than that propounded

in the two Brandt reports. For those of as working io developing countries the misuse of official aid is a commonplace occurrence and has led to a general disillusionment in the whole process. The fault, sometimes, is with the donor who has not monitored the grants and loans sufficiently tightly to ensure that the money is spent as it was intended. It is evident now, however, that this lesson has been learnt and that the

accountability and administration of

aid is being better handled than

previously.

The voluntary agencies who do work among the poorer sections of the community in developing countries maintain that, in large measure, aid given through them goes further and to the people it was intended to help. There are, of. course, mistakes and failures but the plight of the poor in the developing world would be far worse if it wasn't for the work of countless agencies who are attempting to make life for these people more tolerable notil such time as they are able to stand on their own feet.

Yours faithfully, A. MICHAEL WOOD, Director General, African Medical and Research Foundation (AMREF).

CND and propaganda From Mr P. G. Hawkins

Sir, In your leading article (April 21) you observed that "a wide variety of people are clearly prepared to join the CND because they wish for onesided nuclear disarmament.... suspect that many people may also be persuaded by current CND appeals into joining without even realising that one-sided nuclear disarmament is, and always has been, a fundamental tenet of CND policy.

CND leaflets currently being distributed to Oxford residents make no mention of unilateral ouclear disarmament and ignore the deterrent purpose of the West's ouclear weapons. They base their appeal for membership and funds exclusively on fear of consequences the United Kingdom.

The message they put across is:
"Cruise and Trident will make you a

larget for nuclear attack and will be ineffective to defend you in the nuclear war which will follow - so help to ensure that they are not installed by joining CND and completing the attached banker's order. This is the only way to ensure that you and your children survive". This appeal to the emotions is at least misleading, if not downright deceitful. Today's consumer protection legislation ensures that oo advertiser of goods of services could get away with such misrepresen-tation. Why should organizations such as CND be able to do so?

Yours faithfully. P. G. HAWKINS, 25 Upland Park Road, Oxford,

Alliance and cruise

From Lord Mayhew

Sir. Mr Geoffrey Smith (feature, April 26) forecasts with reasonable accuracy some of the policies likely to be adopted by the Liberal-Social Democratic Alliance in the field of defeoce. But on cruise missiles he misses the point. A Soviet-American agreement at

Geneva will not be reached without concessions on both sides; and in their negotiating postures both sides have to take serious account of Britain's willingness or unwillingness to deploy.

The British Government has

declared that if oo agreement is reached it will deploy: this relieves the Americans from any British pressure to make concessions. The Labour Party has declared that it will not deploy in any circumstances: this relieves the Russians from any British pressure to make concessioos. But if we declare, as the Alliance is likely to recommend, that we will deploy or not deploy according to the negotiating pos-itions of the two sides, we shall be bringing powerful pressure on both of them to agree. Yours faithfully, MAYHEW. House of Lords.

Democratic monarchies Flight of fancy

From Sir Iain Moncreiffe of that Ilk Sir. King Umberto's recent death in exile reminds us that the majority of genuine democracies io Europe safely west of the iron curtaio, whose people can choose their fate, are constitutional monarchies: the three Scandinavian monarchies, the three Benelux monarchies, ourselves and renascent Spain, not to mention happy Liechtenstein and Monaco.

they asked politely, "How is Elizabeth?" and were thrilled to see the Queen's portrait on our coins. Yet when I telephoned soon afterwards to the West German Embassy in London to ask their President's name, the answer was: "Sorry, I'll find out." It turned out to be Scheel. And how many Africans or Americans who know our splendid Queen could name the worthy Presidents of Italy and Greece today?

Why, then, are the Italians so afraid of true democracy that neither the late King Umberto nor his heirs are allowed to live (or even die) in Italy in case, after getting to know them, the Italian people were to choose to exercise what should be their democratic right to re-elect them to be their constitutional monarchs if it were to become the popular will? Yours truly,

Sir, The evidence of a BBC Unnatural History Unit (letters April 19, 23) has oot always been so prevalent. In the good old days, "FX" had to be right. Restoration of the Victorian West Pier at Brighton may start as early as next year (Our Environment Chriespondent writes). Brighton Borough Council has agreed to pay half of the £25,000 needed to finance a study of the project.

The Brighton West Pier Trust gave a warning early this month that refusal of support from the council could end hope of restnring the crumbling and evocative monu-

ment in generations of Victorian seaside halidays. Mr Jahn Lloyd, scenetary of the trust, said yesterday: "We are much more confident now. I hope that we can start actual work next year, but completinn may take many years." The pier has separate official listings as a dangerous structure and a historie building of the highest importance.

OBITUARY

GEORGE BALANCHINE

Major force in 20th century ballet

George Balanchine, one of the greatest of choreographers and the founder of the New York City Ballet, died in New York on April 30 at the age of

The supreme survivor of the Imperial Russian ballet's traditions, he nevertheless called himself a Yankee and spent most of his career in Manhartan. Aristocratic in manner he was also classical ballet's greatest popularizer, and more of his ballets are regularly danced throughout the world than those of any other choreographer in baller's history. One factor common to all his work was his extraordinary respect for music and his understanding of it coupled with a catholic enjoyment of many different musical

styles. Balanchine's contribution to ballet in the twentieth century can be likened only to that nf Marius Petipa in the nineteenth. Both men carried the pure classical tradition from the land of their birth to a new home where it took new root. Each of them polished his own in-terpretation of the classical style to the point where it became accepted as a standard against which others were judged. Balanchine's fate was happier than Petipa's however; in spite of the challenge of younger rivals, he remained the ac-knowledged master until his

death. Georgi Melitonovich Balanchivadeze was born in St Petersburg on January 22, 1904, the son of a Georgian folk musician. His family wanted a military or naval career for him, but he auditioned for the ballet school of the Imperial Theatres. and was accepted.

While still at the school, aged about 16, he made his first choreography, a love duet to Anton Rubinstein's La Nuit which was thought daringly

erotic.

Even after graduating in 1921, young Balanchivadze's ambition was actually to become a composer, and he enrolled at the Petrograd Conservatory of Music. However, he eventually decided that he had not the talent for composition and chose, luckily for the whole future of ballet to concentrate on that art.

Balanchivadze got together several friends to present some Evenings of the Young Ballet in 1922-3, featuring largely his own choreography to music by Chopin, Ravel, Scriabin and himself among others. He staged Cocteau's and Milhaud's Le Boeuf sur le Toit and a mime to Blok's poem The Twelve. But soon the theatre authorities forbade the dancers to take part in such unauthorized activities.

mitriev, who had obtained permission to arrange a foreign tour for a group of singers and dancers. On arriving in Berlin, orders followed them to return home. The conductor and other singers obeyed, Dimitriev and the dancers remained.

Under the title of the Soviet State Dancers, the group danced the Empire, London, on a variety hill. During that engagement, Diaghilev invited them to Paris to audition for his Russian Ballet and engaged them. Diaghilev simplified his new recruit's name for western audiences, to Balanchine. ballet sequence by Balanchine for the first English talking film, Dark Red Roses, when they heard of Diaghilev's death. Balanchine was offered a contract at the Paris Opia but fell seriously ill with pneumonia and pleurisy soon after begin-ning rehearsals. When re-covered, he staged dances for the Cochran Revue of 1930 at the London Pavilion, then spent some months in Copenhagen staging six works for the Royal Danish Ballet before returning to London to mount dances at the Coliseum for Sir Oswald Stoll.

In 1938 the contract with the Met ended, and so did the American Ballet. But the School continued. A teacher of marked individual views, Balanchine selected teachers with care, and repeatedly chose its best graduares to become his dancers.

For a time, Balanchine busied himself with Broadway shows and Hollywood musicals and during 1941 the American Ballet was temporarily revived for a goodwill tour of Latin America: Balanchine creating two enduring classic ballets for the occassion, Concerto barocco and Ballet Imperial. Again he found himself

without a company of his own but made works for several other troupes, notably Danies concertantes (1944) and Night Shadow (1946) for Ballet Russe de Monte-Carlo, Waltz Academy (1944) and Theme and Variations (1947) for Ballet Theatre, and Palais de Cristal Content towards and Palais de Cristal (better known now as Symphony in C) for the Paris Opera.

Meanwhile Kirstein, back from war service, had conceived the idea of presenting performances of new ballets to an audience exclusively of sub-scribers. Ballet Society, as it was called, gave its first programme in November 1946 in the unpropitious surroundings of the Central High School of Needle Trades, but the two works given aroused enthusiasm. One was a danced version of Ravel's The Spellbound Child, the other was the first distinct manifestation of the distorted, inverted but still lucid classical style that Balanchine evolved for the choreographic treatment of modern music, in this instance. With a dash more luck Rotherham, more controlled and direct, could have seen the brighter side of the wicked three-point system.

Langer emerges Haslam is from the cloud master of wet track

Britain seem to be heading for victory in the annual Mariboro Transatlantic Trophy series. After the second round at Snetterton, Vorfolk, yesterday they led the Juited States by 161 points to 133. The master of the wet conditions was Ron Haslam, from Langley Mill, who won both races comfortably. Haslam also had his first victory on his Grand Prix NS 500 Honda and is oow lying equal second in the world championship

"It was mute an easy ride in both races once I got out at the front," he said. "I decided to play it steady at the start and let my tyres warm up." Haslam took over the lead from Kenny Roberts, of the United States, on the fourth lap of the first

leg was when he did a front wheel side at the halrpin.

Randy Mamola, of the United States, who won both less at Oultoo Park on Saturday, lost his chance of taking the £20,000 grand slam prize when visor misting slowed him down to the first race. He finished riding with a broken

left leg. In the second race he was fourth.

Britain's captain, Barry Sheene, who was eighth and seventh on Sahurday, fared better in the wet yesterday, finishing fourth and sixth. Wes Cooley, of the United States, crashed in practice, damag-ing his machine, but he cruised round to score points. His compatriot, Mike Baldwin, could complete only one lap in each race because of two broken bones in his foot after crashing at Oulton.

Bernard Langer, of West Germany, won the £60,000 Italian Open championship after an exhilirating final round on the Ugolino course here yesterday. Langer and Ken Brown, of Britain, both returned final rounds of 68, but they were forced into a three-way play-off when the Masters champion, Severiano Ballesterns, made an Severiano Ballesteros, made an cagle three at the last for a 66.
The rama was heightened when a cloudburst left the last green with a line-inch covering ofwater and Brown was forced to mark his ball

some three feet from the hole. Thirty minutes later, he was able to return and he confidently holed out to confirm his place in the play-off. Ballesteros went out at the first extra hole. At the second Brown missed the green and Langer made oo doubt about winning when he holed from four yards. Even so, Brown can regarded this performance as confirmation that he has regained the confident approach he brought with him into the pro-fessional game. He is recognised as

one of the finest stroke-makers among British golfers and he emphasized his ability by making scarcely an error oo the roller-coast-The final round burst into bloom after nine holes, at which point Brown and Langer, both out in 35, led Ballesteros by two strokes. Burgos (Reuter) - Noel de Jonckheere, of Belgium, easily won a sprint finish to take the twelfth stage of the Tour of Spain race yesterday, two seconds ahead of his compatriot, Guido van Calster, who finished with the pack. Jonckeere covered the 92 miles from Logrood to Burgos in rain and high winds in 4hr 26mins 20secs.

Alberto Fernandwz, of Spain, who moved into the overall lead on

Saturday, kept the yellow jersey yesterday. Today's stage is considered one of the most difficult. The 117 mile stretch between Aguilar de Campoo and Lagos de Enol ends with 12½ miles of mountain climbs and descents.

Just over the halfway stage a group of 20 cyclists, including Fernandez, Bernard Hinault, of France, Julian Gorospe, of Spain, and Marino Lejarreta and de Jonckheere, moved ahead. This group led by about a minute for the next 10 miles before the pack caught up. The descent into Burgos was very fast, despite the wind and rain. were to run Gorynus before the

In finishing fifth it could be said that Gorytus ran as well in the Guinneas as St Paddy did in 1960 before he went on to win the Derby. But when the crunch came on Saturday nothing could match Lomond's classic meo did well to overcome an indifferent run and stage a late rally that took him past Kuwait Tower and Muscatite into

second place. Tolomeo thus became the sixth horse that Luca Cumani bas trained to be placed in a classic. A win sill chudes him. Tolomeo is unlikely to run before the Derby, while Musca-tite will probably miss the Epsom classic and wait for the Prince of Wales Stakes at Royal Ascot instead.

"Not a bad second string to have," was Bill O'Gorman's comment after watching On Stage win the Palace House Stakes. Besides being the understatement of the season that remark was also a handsome compliment to the stable's first string, Brondesbury, who is still in the wings waiting for better

By finishing second to On Stage under 121b penalty Fear-less Lad also put himself right in contention for top spring honours this season. Fearless Lad is one destined to go to Sandown Park at the end of this Prince Spy, an equally impressive winner at Newmarket the day before, in the Duke of York

Stakes at York.
Out of luck in the Guineas, Cecil at least had the satisfaction of seeing Precocious win the Philip Cornes Nickel Alloys Stakes decisively. That means that he has now run three twoyear-olds this season and won the help of Pat Eddery, who is he finished fifth behind ber.

Piencourt has often been considered ungenuine, but he is a reformed he-way victory in Kempton's Greenbam Ballast Handican on Saunday Now the five-year-old is on schedule to take on the cream of the spirit handicappers in Royal Ascot's Wokingham Stakes on June 17.

"People have been very rude about Piencount in the past, but these was are making them think again", the trainer Cliff Austin, said adding, "he but ungermine, the fact is that on occasions he has been slowly away from the stalls and as a result has had too much to do."

John Dunlop introduced a \$275,000 colt, Beach Palace, in the Windsor Park Maiden Stakes, but Shaikh Mohammed's colt finished last of the 24 runners. Victory went to Spanish Bold, a rare winner for Peter Gaza. whose fortunes have been at a low ebb in recent seasons.

Olivier Douieb intends to run
L'Attrayante in the Goffs Irish 1,000

Guineas at The Curragh on May 21, and this is also the race selected by Criquette Head for Maximova. L'Attrayante has raced well in topclass company all her career, and she turned the tables on some of her rivals yesterday probably because Alain Badel has learnt to tuck the filly away until the last possible

Mysterieuse Etoile took over the lead 300 yards from the post, but the filly could not hold the late challenge of L'Attrayante, who took trailings of L'Attrayante, who took the lead with half a furiong left to run. In previous races, L'Attrayante had twice been behind Mysterieuse Etoile, who was squeezed for room at the beginning of the straight and came back with a cut on her near hind.

Miti Saliba will next run Mystertieuse Etoile in the Prix Saint-Alary, which is also the chosen race for the honest Little Meadow, who once again ran nn well in the final stages. Juan Lowe said of Goodbye Shelley: "She dinn't run her race, but she does Prix Sandringham at Chantilly no

> Mercy Rimell: trainer of Very Promising.

Peter Haynes immediately annunced that the Royal Doulton had been the seven-year-old's nbjective all season. However, Very Promising still looks a banker bet.

Promising still looks a banker bet.

The £12,000 Sporting Chronicle Spring Handicap is the feature race at Doncaster. Michael Stoute, the trainer in form, runs Baly Dancer, who finished runner-up to Ivano in the Earl of Setion Stakes at Newmarket. Both Hills Pageant and Ridgefield are also well-fancied. Ridgefield beat Hills Pageant by eight lengths in the Rosbury Handicap at Kempton Park. Hills Pageant now meets his conqueror on The better terms and will also be much fitter. Paul Eddery rides Peter

on This better terms and will also be much fitter. Paul Eddery rides Peter Walwyn's four-year-old who looks the main danger to Baly Dancer in a tricky handicap. Stoute could well complete a double by also winning the Pelcid Maiden Stakes with

Afzal.

The two best bets at Doncaster should be Batoni and Dentschmark. Batoni was backed down from 10-1 to 11-2 before sprinting home by one-and-a-half lengths at Thirsk last week and should be too sharp for New Express in the Coal Miners' Stakes. Dentschmark ran well behind One O'Clock Jump at the first Doncaster meeting to suggest.

Very Promising to follow a pattern

Women trainers have been in the news recently. Ma Biche's triumph for Criquette Head in last week's 1,000 Guineas followed hand on the heels of Jenny Pitman's victory with Corbiere in the Grand National This afternoon at Haydock Park Mercy Rimell, the first of her set to Hurdle, can strike another blow by capturing the Tia Maria Hurdle with Very Promising. Mrs Rimell's husband, Fred, won

the National Hunt season's richest handicap hundle prize with Royal Gnye and Gaye Chance and Very Promising has similar credentials to this pair. The five-year-old is only a navice but has sound claims to be regarded as the season's best young hurdler. He showed a fine blend of speed and stamina when beating Connaught River at Aintree and had previously strode home in the Panama Cigar final at Chepstow after Deep Wealth's fatal fall at the third flight from home.

Of his rivals, Ekbalco continues Of his rivals, Ekbalco continues in good heart as she showed when winning the Welsh Champion hurdle at Chepstow and when narrowly defeated by Rnyal Vulcan at Avr. The Foodbroker and Avindale Princess are other horses in form at the right time. The

RUGBY UNION: AGGRESSION TACTICS DECIDE CUP FINALS

Bristol fashion has style

it has taken shastol a long time to win a John Player Cup Final, but it has been worth waiting for. In besting Leacester at Twickenham on Saiurday by three goals, a try and two penalty goals to a goal, a try and four penalties, they showed all the style which has made them such a delightful seam to waith for so long — outside the scruffy contines of typeck out competition.

knock-out competition.

Having hurdled this final barrier their belief in themselves should serve them well. They will go into that Cup rugby next not after the essentials of any team, that it is still a game for all 15 players, that it can

a game for all 15 players, that it can be played with freedom.

This was the best final in the short history of the knock-out competition, played before the best carowd of 33,000. Even when Bristol were 12 points ahead with only four minutes of proper time left, they knew they were not home; it is to their lasting credit that they kept playing with the same commitment and skill, and ended the game fiercely attacking the Leicester line. fiercely attacking the Leicester line. Leicester were true to themselves,

too. Their stand-off, Cusworth, who was part of their three-year Cup winning progress said: "This was the best final I've played in and we lost. What more is there to say about the game." There had been fears beforehand that Bristol might freeze. It did not happen. Even in the first 20 minutes when Leicester dominated the manls and went into a 10-3 lead, Bristol stayed cool, made their own luck, and became stronger and more convincing as the stronger and more convincing as the second half wore on.

They ingnored the loss, with n damaged rib cartilage, not their experienced hooker Bogira after half an hour. Their front row took the strain but it was their back row who placed an indelible mark upon the proceedings. I doubt if Rufter has placed many more effective sames. played many more effective games for Bristol; if ever a player deserved to take both county championship and Cup final in one season it is he. Sweeping across the line behind his threequatters he, Hesford and Polledri, placed such pressure on the Leicester midfield that they could seldom create openings,

Bristol's young midfield players not only obeyed Rafter's final instruction, which was to tackle, but they also had the nerve to run and there was immense satisfaction in Bristol's third try which sprang from Leicester's ball, manied back by Bristol and sent spinning down the

ball was firmly in Swansea's court, metaphorically speaking, for they had to prepare measures to

counteract the expected onstaught from Pontypool's forwards. In the more practical sense, they hardly saw the ball, and as the final of the Welsh Cup, sponsored by Scheppes, wore inexorably and drearily to its inevitable conclusion, Swansea were all standed without care representations.

Bristol's boldness typified by the determination of Harding to ward off Dodson's challenge.

curiously the Bristol middeld greatly resembled Leicester's - only the years intervened. Barnes and Cusworth, the little men who can kick and run and pass, Hogg and Dodge, the strong, steady players, support men, doing what needs to be done; Knibbs and Woodward, all be done; Knibbs and Woodward, all legs, the matchstick men capable of opening up any defence from broken play. Barnes in particular, had an outstanding game, both with his tactical kicking and his place kicking, which must have lifted Bristol's spirits at a time when they most needed it.

The fine touches in Leicester's game were missing nowhere was this better illustrated than when they ran nut of their own 22 m the first haif. Barnwell came in from the first haif. Barnweil came in from the blind side wing outside his centres, juggled with the ball before controlling it but still had Evans free with 70 metres to go. A try was a possibility and indeed nne was scored, but not by Leicester. The pass cannoned off Evans, Carr got his boot to it and the ball bounced up into his bands for his second try up into his hands for his second try.

He was then late tackled and while Richards sent Johnson over the try-line referee Roger Quittenton awarded Leicester another penalty, which Cusworth kicked.

Bristol might claim that Cusworth, having indicated the kick at acceled did not convincing take at

Equally several Bristol players relaxed when they heard the whistle, possibly leaving more room for Johnson to score. It is one of those controversies the game loves.

Barnwell has operation

Tim Barnwell, the Leicester left wing, has undergone an operation for the removal of a blood clot on the brain. He was led from the field after a head-on collision with David Palmer, the Bristol replacement hooker, in the first half of the John Player Cap final on Saturday. He was taken to the West Middlesex Hospital and later transferred to the National Hospital for nervous diseases where his condition yesterday was described as stable. His breathing is being assisted by a support machine.

Peter Lewis kicked three penalties in the first half and Blyth two fur Swanser, Lewis extended the lead with another after hair-time. And when, the crowd began a slow handelap, Goldsworthy attempted a drop goal. The handelap changed to cheers, more in relief than anything, as the ball hit the upright, bounced ideally into the hands of Taylor, who ran unopposed for the try near the posts. Lewis converted. IN BRIEF Clear win for Jones

Hugh Jones won the East London half-marathon yesterday in 64min 28sec - more than two minutes and a half clear of the second man Jim Goldring of Walthamstow. Jones took the lead after 500 yards, and passed through five miles in 24min 30sec and 10 miles in 48min 56sec. Colin Moxon, from Hertfordshire, had to fight his way back on course after he was first misdirected and then driven at by a car three times. The driver then got out and times. BADMINTON MBE's set to meet in final

By Richard Eaton England's great strength in doubles gives them hopes of several sets of medals in the world badminton championships which start in Copenhageo today.

start in Copenhageo today.

The most celebrated of the pairs is the defending world women's doubles partnership of Nora Perry and Jane Webster. Along with the European champions, Gillian Gilks and Gill Clark, they are seeded to reach the semi-finals, but both English pairs are likely to find the going tough against the Chiosse going tough against the Chioese, who are competing for the first time ever. Between them, their two pairs have accounted for the last two All-England women's doubles villes.

England's best chances lie in the mixed doubles in which the redoubtable Mrs Perry teams up with the Swede, Tomas Kihlstrom, with whom she won the All-England title. The seedings indicate that a clash of badminton's two MBEs should take place in the final, with Mrs Gilks partnered by Martin

Dew, the left-handed London University post-graduate, is likely to meet Kihlstrom twice, because he and Mike Tredgett, runners-up to Kihlstrom and Stefan Karlsson in the All-England championships, and seeded third, are scheduled to attempt a revenge over the Swedes in the semi-final round.

Meanwhile, China will have an excellent chance of dominating the singles titles in the way they did when they first entered the world team event, the Thomas Cup, last 7-6,6-1 year. Much, however, may depend upon Luan Jin, the No 4 seed, repeating his surprise All-England success against the top seed. Morten Frost, the history student, playing in

his home city. Liem Swie King, the former All England champion from Indonesia. and Han Jian, of China, the No. 2 seed, are also in with a chance of the title, but it is almost impossible to see any other than one of the four

singles title. ● The Thomas Cup and Uber Cup are likely to be held every teo years with eight teams in the fioals. Shuaib. Secretary of the Badmintoo Association of Malaysia said in Kuala Lumpar (AFP reports).

Torrential rain, however, washed out the first day's play at Solihull. Five matches had just good out wheo the rain came and nood of them had progressed beyond four

games. Feaver, who had to save a match point in the tenth game of the final set, has been out of competition for set, has been out of competition for two months after an operation on his right leg. In that time his world ranking has slumped well below the limit required to get into the Solihull main draw.

On Saturday's form it should not take him too loog to improve it as he showed when he put in a strongish to win from 2-4 in the final set.

■ Episode four of the 12-part series VIETNAM (Channel 4, 9.00pm) is not the sort of fare usually associated with Bank Holiday viewing, which comes as B welcome relief. LBJ Goes to War examines the reasons that led to President Johnson's escalation of his predecessor's firmited commitment policy to one of full-scale war. President Diem'a assessination in 1963, followed three weeks later by President Kennedy's death, was the beginning of the end for South Vietnam. In the 18 months following the two deaths, there were six changes of government with the resultant instability taken advantage of by the communists of North

"We owe it all to our very own Prince Golitsyn," the champagne factory manager said. We raised our glasses of clear, sparkling Soviet champagne and drink to the memory of the Prince, who in the eighteenth century had had the foresight to lay the foundations of Russian vini-culture on his landed estates in the Crimes.

Even through a slight champagne induced haze, the rough-hewn and jovial factory manager did not look like a man who could claim kinaship and the state of Pursing addess. with one of Russia's oldest aristoratic families. Nor could he as it turned out, since (like Stalin) he was the son of a poor family from Georgia. Just to be on the safe side we drank toasts to Stalin as well. On of the most striking

paradoxes of Soviet life is that champagne is the drink of the working man. Today is the Feast of Saint Athanasius who was born c296 in Alexandria. In 328 he became bishop of that city, and devoted his life to execute the saint and devoted his life. life to opposing the doctrine of Arianism. Despite exile and much uncomproming in his attitude until his death in 373. suffering Athanasius remained

Countryside appeal

The Countryside Commission has asked motorists and motor-cyclists not to drive on the prehistoric Ridgeway path along the Oxfordshire and Willshire Downs on Sundays and Bank Holidays from now to the end of October. The path is classed legally as o road even though it is a track. The Commission appealed to those who must drive on it on those days to keep below 25 miles an hour.

coming in. Spotted Bycatchers are back: they sit hunched on a gate-post, dart into the air for a passing insect, and map back onto their perch as if they were tied to it by clastic. They have a thin song, not often heard. In Wales and the Scottish Border country, pied flycatchers have returned to the woody hillsides. They too bawk for insects, but usually start and land on different perches their song is a loud, bright warble. Curlews are nesting on the grass-moors; the male hovers and glides over the nesting-grounds, his ringing, trilling song audible from far away. Whimbrels, the smaller relatives of the curiew, are making their way up the coast to the Orkneys and the Shetlands.

public life is a growing disenchant-ment among politicians with the freedom of the press, The Sunday Times said. The press; main reply to threats of future regulation is to point to the self-regulation already arried out by the Press Council However its chairman has an nounced at short notice his intention to resign and, shrouded in secrecy, his successor has evidently been fixed. "It is unsatisfactory that the Council, which exists among other things to uphold openness and free discussion, should conduct its own affairs so secretly," the paper

"Only the bind, the toousn or me dishonest could now deny that Britain is well on the way to economic recovery, said the Sanday Express. "But the Labour Party leaders will have none of it, by trying to damn the clear evidence of recovery they risk damaging the confidence that plays so vital a part of any revival. Of all the Labout leaders many faults, isn't knocking the country the shabblest of them
